

Cherry Tomatoes

Mexico Midget

Big tomato flavor in a 1/2" to 1" bright red cherry tomato! Hundreds of small fruits on indeterminate plants. This plant has roots in perennial Mexican tomato plants. Winner of the 2014 Seed Savers Exchange Tomato Tasting!

Sunrise Bumblebee

Sweet and tangy flavor! Yellow with red and orange stripes. Vigorous grower and productive plants. 1" round cherry tomatoes.

Lucky Tiger

Exceptional and juicy flavor in this 2"-3" oblong cherry tomato! Produces early in the season and is productive throughout the entire growing season. Green with red and yellow streaks.

**** pick when green with a hint of red****

Black Cherry

Dusky purple-black fruits that are 1" and round. This is a classic cherry tomato with complex, well-balanced flavor that is a good producer starting at mid-season. Black cherry is a must grow in my garden every year!

Maglia Rosa

Pink cherry tomato with gold stripes that got its name from the jersey worn by the lead racer in the Tour of Italy. Highly productive and semi-determinate variety makes it a good plant for container growing and small spaces. Fruits are 1"-2" and oblong with points on the bottoms. Produces early and heavily!

Sungold

One of the most popular cherry tomato varieties! Fruit is ½" to 1" and round, ripening to a bright orange. Flavor is sweet and delicious. This is a tomato to be eaten by the handful!

Medium/Beefsteak Tomatoes

Biskaya Roza

Pink tomato that is on the smaller side of the beefsteak tomatoes. This tomato is productive and early and not to mention delicious!! We love this variety and grow it every year. It is a sweet tomato with well-balanced flavor that will produce throughout the growing season.

Rebel Yell

Medium dark pink beefsteak tomatoes on potato leaf plants. Vigorous and indeterminate grower that will produce heavy yields of fruit early to midseason. The taste is quite extraordinary and reflects this plant's parentage (stump of the world x bear claw). Everyone should try this one!

Wild Thyme Bicolor

Slightly ribbed medium beefsteak. The color is yellow with a pink to red blush (but not on all fruits). This is an indeterminate, potato leaf plant that produces fruits from midseason until the first frost. The flavor was delicious and complex and was my favorite yellow tomato of 2020.

Girl Girl's Weird Thing

As pictured in my very hands, a gorgeous large red and green striped beefsteak. This tomato is named after the breeders' dog Girl Girl who would steal these tomatoes out of the garden and eat them... yes they are that good! Sweet and rich tomato on a productive plant that will produce from midseason until the first frost. It is a stunning tomato.

Costoluto Genevese

A medium sized classic Italian heirloom from the early 18th century that has full ruffles and delicious acidic, classic tomato taste. This is a very versatile tomato and can be used to make sauce or eaten as is. It is a very early and productive variety and was my favorite paste tomato of 2020.

Cherokee Purple

This tomato is an old Cherokee Indian heirloom passed down through a family and given to seed collector and tomato connoisseur Craig LeHoullier. This tomato has since earned its place amongst the top tomatoes for its amazing, rich, complex flavor and beautiful deep purple color.

Green Gables

sized beefsteak that is very early and a massive producer. The green tomato gains an amber hue when it's ready to pick. The flavor is sweet and juicy! This is a great green tomato for a first-time green tomato grower!

Peppers

Carolina Reaper

Just about the hottest pepper on earth with an average scoville rating of 1,569,300! It was developed by grower Ed Currie of South Carolina and is a red and bumpy pepper with a stinger end. One pepper is enough for the home chef to make a hot sauce of fiery proportions! Try it out... if you dare.

Lemon Spice Jalapeno

It's like an early green jalapeno but it's hotter and yellow! Awesome plant, great flavor, moderately productive.

Green when ripe tomato from breeder Jason Haynes. This is a small to medium

Mini Bell Pepper

SEEDLING SELECTIONS OF 2021 BY GTHEGARDENER

Assorted colors of mini bell peppers! More productive than a regular bell pepper plant with a shorter grow time.

Carmen

Sweet and productive, carmen is a 6" long red pepper from Italy with great flavor. It is a midseason pepper and a fast grower.

Sweet Banana

Mild pepper, medium sized with a tangy slightly sweet taste. These make excellent pickling peppers. They start off as bright yellow and mature to green, red, or orange.
